Profile

Computer Engineering graduate with strong experience in **full-stack web development** and a focus on creating modern, **responsive applications**. Skilled at turning ideas into clean and scalable solutions by combining technical knowledge with design awareness. Experienced in both frontend and backend development, ensuring smooth integration and reliable performance. Passionate about **problem-solving**, writing maintainable code, and working well in **team environments**. Always motivated to learn new technologies and build impactful digital experiences.

Professional Experience

Unite Bilgi Teknolojileri 🔗

ServiceNow Developer   08.2025 – 09.2025
İstanbul, Türkiye
- Designed and customized ServiceNow portal pages for end-users, creating reusable widgets with HTML, CSS, JavaScript, and Angular to improve efficiency and user experience.
- Developed and optimized ServiceNow database tables to ensure well-structured data organization and easy accessibility.
- Built and configured dashboards that deliver critical insights clearly to users, enhancing overall platform usability and decision-making.

Low Code Developer   01.2025 – 08.2025
İstanbul, Türkiye
- Designed, developed, and managed end-to-end ETL pipelines using Microsoft Azure Data Factory, integrating, transforming, and loading data from REST APIs and databases to support business needs.
- Automated complex workflows to enhance operational efficiency, minimize manual tasks, and streamline business processes.
- Acquired hands-on experience in ETL concepts, cloud-based data processing, and process automation, while strengthening problem-solving abilities and the capacity to apply technology effectively to real-world business challenges.

Etiya Bilgi Teknolojileri Yazılım San. Ve Tic. A.Ş. 🔗

Business Analyst Intern

11.2023 – 12.2023
İstanbul, Türkiye

- Actively participated in projects during a one-month internship as a Business Analyst, applying Agile project management methodologies and gaining hands-on experience with Oracle and MSSQL databases.
- Enhanced technical skills in database management and analysis while also developing collaborative teamwork and flexible project management capabilities.

Business Analyst Intern

05.2023 – 06.2023
İstanbul, Türkiye

- Actively contributed to projects within the Agile project management framework, gaining hands-on experience with Oracle and MSSQL databases.

Business Analyst Intern

10.2022 – 12.2022
İstanbul, Türkiye

- Had experience in working with Oracle Database for database management and development.

Education

Bachelor's Degree of Computer Engineering

2019 – 2024
İstanbul, Türkiye

Istanbul Aydin University

- GPA: 3.49/4

Bachelor's Degree of Management Information Systems

2019 – present
Eskisehir, Türkiye

Anadolu University, Correspondence Faculty

Projects

Taner Peyzaj Website 🔗

- Designed and developed a **visually engaging website** to showcase professional landscape architecture services, targeting a wide audience with a modern, minimalist interface. The project involved **full-stack development** with Next.js, TypeScript, and Tailwind CSS, focusing on delivering a mobile-responsive and adaptable design.

- Created key sections such as a portfolio, service descriptions, and a contact page. I implemented smooth animations and visual transitions to enhance the user experience, resulting in an intuitive navigation structure that received positive feedback from users.

- Learned to effectively apply **responsive design principles** and improve project management skills within a larger project scope. This project strengthened my technical skills in **front-end development** and reinforced the importance of ensuring both functionality and visual appeal.

Full-Stack Blog Application
   • Developed a full-stack blog application where users can view, comment on, and create posts, fostering community interaction in an intuitive and responsive environment. Built with **MongoDB**, **Express.js**, **Node.js**, and **React** (using Vite.js), along with **Tailwind CSS** for modern styling and Flowbite React components for enhanced UI consistency.

   • Implemented a secure **JWT-based authentication** system alongside **Firebase** for optional Google login and media storage, allowing users to sign in, manage their posts, and upload images seamlessly. Designed and integrated key features such as profile viewing, a commenting system.

   • Focused on delivering a visually appealing, mobile-responsive design that prioritizes user engagement, achieving a modern look and an organized layout. This project reinforced my skills in **full-stack development**, **responsive design**, and **managing complex application features**.

Health Management System
   • Developed a **full-stack healthcare application** with a shared Supabase backend and unified authentication system, supporting both React-based web and iOS mobile platforms.
   • Designed a user-friendly interface where users can track personal health data, view medical records, and manage appointments across devices with real-time data consistency.
   • Implemented a community forum feature that enables users to discuss health topics, share experiences, and engage with others in a secure environment.

Skills

• JavaScript	• TypeScript	• React	• Node.js
• MySQL	• MongoDB	• Docker	• REST API
• HTML	• CSS	• Bootstrap	• TailwindCSS

Languages

• Turkish	• English
